

Jacksonville

First quarter statistics serve as an indicator of the Jacksonville office market's position prior to the COVID-19 crisis, which began to unfold locally with widespread social distancing measures in March. The leasing and sales environment has changed dramatically since that time, and those impacts will begin to materialize in the data in the second quarter.

Vacancy Rate

YTD Net Absorption (SF)

Average Asking Rent Rate (\$/SF/FS)

Healthy Leasing Fueled the Office Market During the First Quarter with No Major Speculative Development Underway

- The bulk of the positive net absorption recorded during the first quarter was principally located in the Baymeadows and Deerwood submarkets, with the urban core recording relatively anemic absorption during the first three months of the year due to typical space rollover during the first quarter. Leasing activity was healthy, however, with five new lease deals north of 10,000 sf.
- Year-over-year vacancy for the period ending with 1Q-2020 is up 101 basis points and the average asking rent is up 2.4% over the same period.
- The largest investment sale during the first quarter was the acquisition of Town Center One and Two in Deerwood Park for \$107.1 million, or \$277 per sf. The two class A office assets were purchased by

- TPG Real Estate. Also notable, ShareMD purchased the 494,437-sf office building at 841 Prudential Dr for \$67.0 million, or \$136 per sf. The company offers medical office and co-working space to providers of medical and ancillary services.
- Prior to the impact of COVID-19 late in the first quarter, Jacksonville's job market was strong, fueled by a relatively low cost of living, slow but steady expansion of the business base, and a greater supply of available land. Even though job growth was occurring in the professional and business sector, it had not yet translated to an acceleration in measurable office demand, and likely will not in the near term as the market contends with the economic fallout of the current pandemic.

Trends to Watch

Development Plans

Most mixed-use developments moving forward will be required to incorporate a retail and residential component along with office space.

Changing Footprints

A shift is expected in the amount of square feet needed per employee now that a larger share of the workforce may be working remotely for some time.

Delays Possible

Rising economic uncertainty and job losses at the close of the first quarter may put some recent development plans on hold in and around the urban core.
