AVISON YOUNG

Office Market Report / Third Quarter 2020

Tampa Bay

Leasing velocity picked up during the third quarter with shorter-term renewals outpacing new deals

Tampa's economy is fairly diversified and as a result is somewhat more insulated than other Florida metros like Orlando and Miami to the significant economic shock being felt within the leisure and hospitality sector. The market continues to recover from the damage inflicted by COVID-19 beginning this past spring, and while the shadow of sublease space looms, it is now clear that the overall picture is not as bleak as previously feared. Unemployment rose to 13.2% in April of this year, the highest in over 30 years, but fell considerably to 6.8% by the end of August according to the Bureau of Labor Statistics (well below the state average of 7.3% for the same period).

Leasing velocity has begun to accelerate following a temporary interruption in demand due to the pandemic, although many deals were shorter-term renewals. Several large lease transactions were concluded during the third quarter, most notably Heritage Insurance's lease of an 88,643-sf building in Westshore City Center. An in-market move, the Clearwater-based company will be relocating its headquarters in the spring of 2021. Single-story office leasing may be a bright spot in the coming months as it allows companies to not only implement cost savings measures but also offer safer, more controlled physical environments.

The calm before the sublease storm

The overall vacancy rate rose slightly by 19 basis points to 11.64% during the third quarter, and the impact of sublease space will continue to effect the market well into 2021 as companies evaluate their future needs and the effectiveness of their work-from-home strategies.

COVID-19 is acting as an accelerant for companies already seeking to downsize and consolidate their existing floor plates. While sublease space only accounts for 14.2% of all vacant space as of now, that number is expected to rise well into the spring and could put pressure on direct asking rents and concessions.

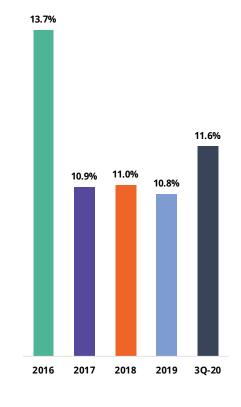

Investment activity remains muted

Total investment volume for the trailing 12-month period ending September 2020 was -45.0% at \$479.6 million. The debt market is opening back up but interest in industrial investment is crowding out potential debt and equity investment for office product and capital for value-add suburban office product remains harder to find.

Looking ahead toward 2021

Some of the fear that personified the beginning of the current pandemic is fading and is being replaced by a sense of optimism that this will in fact be a short, V-shaped recovery with a quicker return to strong fundamentals. Deals are getting done and business continues to forge ahead, even though tomorrow's workplace needs are not fully evident today. That said, headwinds are expected to persist into 2021 and may remain until a full-scale vaccine is readily available, further allaying corporate and investor concerns.

1.96 msf of new office space is underway and scheduled to deliver by the end of 2021, putting upward pressure on the

vacancy rate.

| Clearwater Pointe | 23,454 | \$3,300,000 | \$141 | NA | Broker Insurance Marketing | North Pinellas |

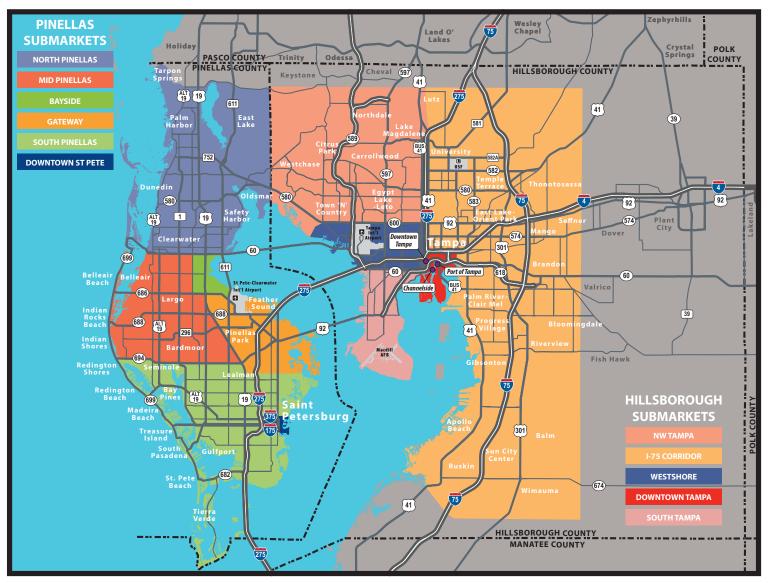

Asking rents largely holding steady and the glut of expected sublease space has yet to appear.

There was a slight increase in rents over the preceding quarter of 0.4%, which is notable given a slight decline was feared. There could be some downward movement in rents in the next 1-2 quarters as additional sublease space hits the market, and a flight to quality class A space is possible should rental rates decline.

Tampa Bay
